DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/19/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 2, 8, 9, 11, 12, 14, 15, 16, 22, 23, 24, 28, and 31-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Adams (US 2,585,527).

Adams discloses in Figures 1, 2, and 8 a tip cap for a syringe (11) having a tip, the cap comprising a base (17), a body (13) having a textured top wall comprising a plurality of ribs (34) and an elliptical cross-section, and a shaft (12) having a helical thread shaped internally to match the syringe tip.

Response to Arguments

Applicant's arguments filed 3/19/2008 have been fully considered but they are not persuasive. Applicant argues that Adams does not disclose a syringe. Examiner disagrees. The broadest definition of syringe as provided by Merriam Webster Online dictionary is “a device used to inject fluids into or

Art Unit: 3767

withdraw them from something,” which defines the device of Adams. As to the newly added limitations, the tip cap of Adams is used to contain medicament within the syringe – it is not until the syringe of Adams is squeezed that the cap allows medicament to be dispensed, prior to being squeezed (or prior to the cap being removed) the purposed of the tip cap of the device of Adams is to contain the medicament within the syringe, and thus the device meets the Applicants claimed limitations.

Conclusion

All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
